

MASTER★FILE

HOW TO CHOOSE YOUR SHAPE

STRAIGHT

The Straight file is used to file the free edge of the nail.
PERFECT LENGTH AND SHAPE

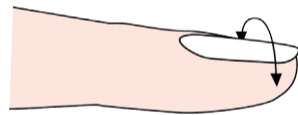

Available in 80/80 100/100 180/180 240/240

BANANA

The Banana file is used to model the builder gel on top of the nail
without damaging the cuticle area.
PERFECT MODEL

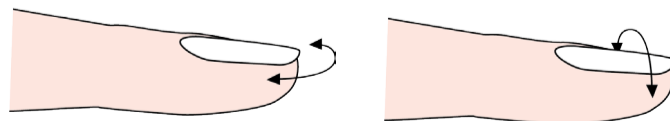

Available in 100/100 180/180

NEW HALF MOON

Stylists' favorite: combination of Straight file and Banana file.
• Straight side is used for filing free edge of the nail
• Rounded side is used to model the surface of the gel nail
PERFECT LENGTH, SHAPE AND MODEL

Available in 80/80 100/100 180/180

MASTER★FILE

HOW TO CHOOSE YOUR GRIT

NEW MASTER★FILE

2 SIDES SAME GRIT

CLINIFILE WHITE 80/80

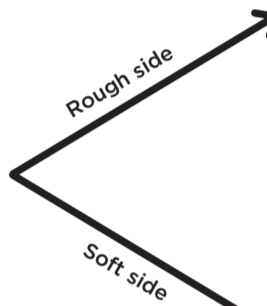

GRIT 80/80 **ROUGHEST**

PRONAILS MASTER★FILE 80

- ROUGHEST FILE
- perfect to remove, shorten and shape very hard surfaces like very thick gel or acrylic nails

CLINIFILE PINK 80/100

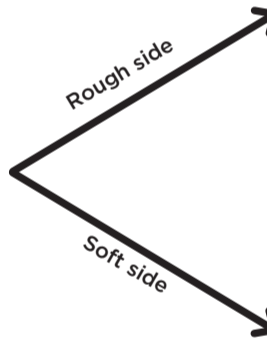

GRIT 100/100 **ROUGH**

PRONAILS MASTER★FILE 100

- ROUGH FILE
- Ideal for fast & easy removal of gel nails.
- Very efficient for shortening and shaping gel nails

CLINIFILE GREEN 100/180

GRIT 180/180 **MEDIUM**

PRONAILS MASTER★FILE 180

- MEDIUM SOFT FILE
- ideal for applying the finishing touch to perfect the shape of your gel nails
- Also suitable for toe nails
- Also used to open the seal before soaking off Sopolish nails.

CLINIFILE ORANGE 180/180

NEW GRIT 240/240 **SOFT**

PRONAILS MASTER★FILE 240

- SOFTEST FILE
- Ideal to file the free edge of the natural nail
- Only STRAIGHT SHAPE because natural nails should not be filed on the nail surface itself.

The lower the grit (for example 80), the bigger the particles and therefore the rougher the file will be. A higher grit file (for example 240) needs many more particles to fill up the same surface area, which means the particles are smaller and will give the file a smoother feel.

80

240

• At first use, you simply need to rub two files together to get started and you will love it.
